

Rubberway® Permeable Rubber Paving Solutions

SUSTAINABLE & ECO-EFFICIENT

Rubberway Pervious Pavement systems are constructed of a recycled crumb rubber granulate that is pigmented in seven color options, and when combined with a high quality polymer, creates a flexible, open grid surface, allowing for rapid drainage.

Design variations such as rubber and rock are available to suit a myriad of surfacing applications and will produce a firmer surface.

Benefits

Freeze/Thaw Friendly	Light Vehicular Traffic
Diverts Tires from Landfills	Reduces Liability Risks
Quick Filtration & Drainage	Resilient, Yet Firm Structure
No Heavy Metal Leaching	Replicates Asphalt & Stone
Manages Storm Water Run Off	Versatile Design Options
Preserves Trees and Shrubs	Easy to Install & Maintain
Water Repellant Binder	Technical Training Programs

FLEXIBLE & ERGONOMICAL

Applications

Treewells	Porous Pavements
Pathways	Tracks
Blacktops	Parking Lots
Trails	Erosion Control
Cart Paths	Emergency Lanes
Sidewalks	Stormwater Management

Color Selection

**Pervious Pavement
Rubber Rock 6000**
